Residential SUD for Adults

Provider Enrollment – Provider Type 54

MAY 4, 2017

Maryland received approval from CMS to allow Medicaid reimbursement for adults in an intermediate care facility setting; this is known as the “IMD Waiver”. Medicaid already covered outpatient services in the community at ASAM levels 1 and 2, and also acute detox services in hospital settings, but the service array of residential addictions services was only allowed for the “under 21” population. As a result of this waiver Maryland will have expanded upon existing outpatient community based substance use disorder (SUD) services to include this important tool along the continuum of care.

Effective July 1, 2017, Maryland Medicaid will reimburse for residential SUD ASAM levels of care 3.7WM, 3.7, 3.5, and 3.3 for adult Medical Assistance recipients. Plans are underway to incorporate ASAM 3.1 in 2019. Additional information and FAQs will be sent out as Provider Alerts from Beacon Health Options. If you are not already signed up for Provider Alerts, you can request to be added to the list by emailing Provider Relations at marylandproviderrelations@beaconhealthoptions.com.
